

IN-PERSON INSTRUCTOR-LED LEARNING

DRAGOS PLATFORM ANALYST (DPAN)

The Dragos Platform Analyst (DPAN) is a one-day, in-depth training led by a live technical instructor. This course is designed to elevate users' understanding, learning, and utilization of the Dragos Platform.

Through interactive lecture, advanced scenarios and discussion, and hands-on exercises, students will become equipped with the knowledge and skills to leverage the full power of the Dragos Platform for analysis.

LEARNING OBJECTIVES

DURATION

- 1 full day
- 8 hours of instruction per day with scheduled breaks.

DELIVERY

- **Public:** These courses are taught monthly across different time zones and are listed in Dragos Academy for easy registration.
- **Private:** Customers may request private courses to be taught either virtually or in person. A minimum number of students is required.

REQUIREMENTS

- A laptop or desktop computer with internet access.
- A Dragos Academy account.

EXPERIENCE (RECOMMENDED)

- Dragos Platform Essentials (DPE) training course.
- 3+ months of Dragos Platform experience.

PLATFORM ARCHITECTURE

Discuss at a deeper level, the Dragos Platform's underlying architecture, enabling more effective analysis.

DATA BACKEND

Step through Dragos Platform backend services and structures to better create Dashboards and conduct in-depth notification triage.

ADVANCED ANALYSIS

Apply threat hunting techniques within the Platform to reactively or proactively identify and investigate potential threats.
