

IN-PERSON INSTRUCTOR-LED LEARNING

DRAGOS PLATFORM ESSENTIALS (DPE)

The Dragos Platform Essentials (DPE) is a one-day, in-depth training that equips new users with the hands-on skills needed to effectively leverage the Dragos Platform.

Through live instruction and realistic scenarios covering the four primary use cases, students will be empowered to confidently utilize the Dragos Platform to strengthen the cybersecurity of their OT/ICS environments.

LEARNING OBJECTIVES

DURATION

- 1 full day
- 8 hours of instruction per day with scheduled breaks.

DELIVERY

- **Public:** These courses are taught monthly across different time zones and are listed in Dragos Academy for easy registration.
- **Private:** Customers may request private courses to be taught either virtually or in person. A minimum number of students is required.

REQUIREMENTS

- A laptop or desktop computer with internet access.
- A Dragos Academy account.

VULNERABILITY MANAGEMENT

Identify, assess, and understand vulnerabilities affecting your assets, enabling proactive risk mitigation.

ASSET INVENTORY

Efficiently detect, organize, and manage critical assets within your OT/ICS environment.

NOTIFICATION MANAGEMENT

Investigate and respond to potential security threats and adversary activity.
