Dragos Corporate Overview

Safeguarding Civilization

THE CHALLENGE

xOT/ICS Environments Are Under Sustained Attack

Cyber attacks on operational technology and industrial control systems have escalated sharply. Power grids, pipelines, water treatment facilities, and manufacturing plants face sophisticated, targeted threats. Unlike IT breaches, a successful OT cyber attack can halt critical operations, endanger workers, and disrupt the services communities depend on. The threat is real, persistent, and growing.

OUR MISSION

Built to Protect What Powers the World

Dragos was founded by practitioners who spent careers defending the most critical OT/ICS environments on Earth. We built the platform we wished we had: purpose-built for operational technology, continuously informed by frontline threat intelligence, and designed to give OT organizations the deep situational awareness and guidance they need to act.

We do not adapt IT tools to OT environments. We build from the ground up for them. Every update, every incident response engagement, and every threat group we track makes our customers more resilient. Safeguarding civilization is not a tagline. It is the reason we exist.

THE DRAGOS OFFERING

Three Integrated Capabilities. One Unified Defense.

→ 01. Dragos Platform *Visibility. Detection. Response.*

Purpose-built OT/ICS technology delivering asset inventory, threat detection, investigation, and prioritized vulnerability management in a single integrated platform designed for operational environments.

- Asset Visibility & Control
- Threat Detection
- Vulnerability Management
- Investigation & Response

→ 02. Dragos Intelligence *Know your adversary before they act.*

Backed by the largest dedicated xOT/ICS threat research team in the world, Dragos Intelligence delivers operationally relevant reporting on threat groups actively targeting your sector.

- Threat Group Tracking
- Sector-Specific Reporting
- Critical Alerts
- Executive Briefings

→ 03. Professional Services *Expert-led. Outcome-focused.*

Highly skilled OT/ICS practitioners ready to assess your environment, respond to incidents, train your team, and build a cybersecurity program calibrated to your operational risk.

- Architecture Assessments
- Incident Response
- Tabletop Exercises
- Practitioner Training

Purpose-Built for the Industries That Cannot Afford to Go Dark

Electric Utility
Protecting generation, transmission, and distribution assets from outage-causing cyber attacks.

Oil & Gas
Securing upstream, midstream, and downstream operations against targeted OT intrusions.

Manufacturing
Defending production lines and industrial control systems from disruption and sabotage.

Chemical
Safeguarding process control environments where a cyber attack can create physical safety hazards.

Water & Wastewater
Protecting treatment and distribution systems that deliver clean water to communities.

Food & Beverage
Securing processing and packaging operations to prevent supply chain disruption.

Mining
Defending extraction and processing infrastructure from operational stoppages and data theft.

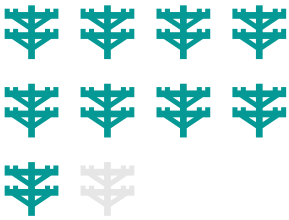
Transportation
Protecting rail, port, and logistics control systems that keep supply chains moving.

Pharmaceutical
Securing manufacturing and quality control systems to protect product integrity and compliance.

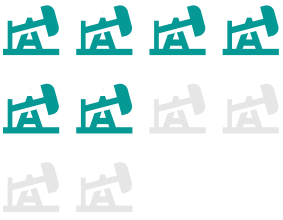
Building Automation
Defending HVAC, access, and facility systems in critical infrastructure environments.

TRUSTED BY THE WORLD' MOST CRITICAL ORGANIZATIONS

Proven at Scale. Relied on When It Matters Most.



9 of 10
Largest U.S. electric utilities trust Dragos



6 of 10
Largest global oil & gas companies rely on Dragos

26+
Named OT threat groups tracked by Dragos Intelligence

RECOGNITION & VALIDATION

Industry-Recognized. Practitioner-Proven.

10+

Intelligence

10+ decades of proactive & OT specific security intelligence gathered by working with world leading organizations, the intelligence community and through our own research and reporting.

1,000s

Thousands Of Organizations

Rely on the Dragos platform, the intelligence and services used to keep organizations safe and mission focused.

30+

Patents Granted

Dragos holds patents covering OT threat detection, asset identification, and ICS-specific behavioral analytics.

A+

CISA & DOE Trusted Partner

Dragos actively supports U.S. government cybersecurity initiatives including CISA and DOE critical infrastructure programs.

> **With the enhanced visibility and asset information in the Dragos Platform, combined with MITRE ATT&CK for ICS mapping, we know we have what we need to stay ahead of adversaries.**
>
> – Jason Nations, Senior Manager of Enterprise Security
> Oklahoma Gas and Electric

WHY DRAGOS

The Only End-to-End xOT Cybersecurity Company.

OT-Native, Not Adapted

Every capability is built from scratch for operational technology. No IT tools retrofitted to OT environments.

Intelligence-Driven

Threat intelligence from the front lines of OT incident response informs every detection, every update, every alert.

Practitioner-Led

Our team has defended nuclear facilities, power grids, water utilities, and pipelines. We know the environment.

Comprehensive Coverage

Platform, intelligence, and services work together. No gaps, no handoffs between vendors.

About Dragos

Dragos, Inc. has a global mission to safeguard civilization from those trying to disrupt the industrial infrastructure we depend on every day. Dragos is privately held and headquartered in the Washington, DC area with regional presence around the world, including Canada, Australia, New Zealand, Europe, and the Middle East.
