DRAGOS ACADEMY

ON-DEMAND LEARNING

OVERVIEW

With a shortage of skilled ICS/OT cybersecurity practitioners, industrial organizations need a way to build the in-house expertise to effectively and efficiently monitor and protect the OT environment. To ensure your team has the fundamental ICS/OT knowledge and proficiency with the tools they need, Dragos Academy helps to accelerate your team's understanding of industrial networks and your time to value with the Dragos Platform.

BENEFITS TO SECURITY & OPERATIONS LEADERS

CROSS TRAIN IT AND OT STAFF

> Operations and engineering staffers are educated on key ICS/OT security fundamentals

> IT security and compliance personnel are educatedon key considerations when working in ICS/OT environments

ACCELERATE TIME-TO-VALUE WITH DRAGOS PLATFORM

> Courses to teach your team the Dragos Platform fundamentals, gain access to tutorials, and operationalize vulnerability management, monitoring, and detection workflows.

CONTINUOUS LEARNING AVAILABLE ON-DEMAND

> Dragos experts continuously produce relevant, easily understandable content to help enlighten defenders and empower them to effectively and efficiently protect your ICS/OT environments.

BENEFITS TO LEARNERS

UNDERSTAND FUNDAMENTAL ICS CONCEPTS

> Learn about the various types of ICS environments, as well as their functions and compositions, and how they apply to your facilities and sector.

DISCOVER RELEVANT DRAGOS PLATFORM USE CASES

> Quickly understand how to use the solution to perform tasks like building and maintaining an assetinventory, assessing and prioritizing vulnerabilities, and OT security monitoring.
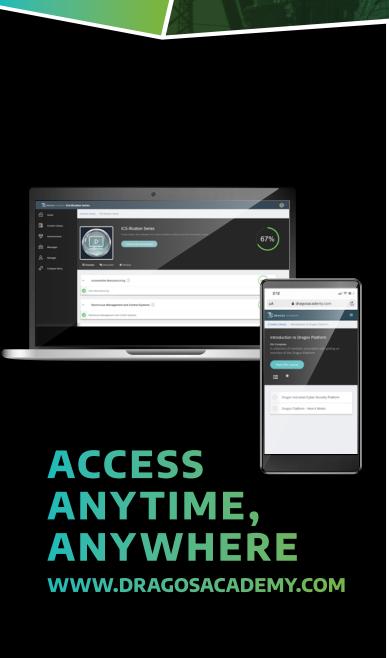

ANYTIME, ANYWHERE ACCESS

> Available on desktop and mobile via the cloud portal. Your progress in each module is saved as you go so you can take interruptions in stride.

DIGITAL RECOGNITION

> Earn digital badges to share on professional social profiles like LinkedIn upon completion of learning objectives.

LEARNING PATHS

ICS SECURITY FUNDAMENTALS

> Introduction to ICS networks
> Assessing the industrial environment
> OT security operations, IR, and intelligence
> Tools, strategies, and techniques for successful hunting in ICS
> Sector-specific considerations for electric, oil & gas, manufacturing, water, transportation, and mining

USING THE DRAGOS PLATFORM

> How to locate and tag assets
> How to identify devices an asset is communicating with
> How to tune alert notification severity
> How to search for vulnerable protocols
> How to hunt for threats
